

## ROOKIE RESEARCH EXPERIENCE

**YEAR  
5/6**

**ACTIVITY  
DURATION  
2 HOURS**

**PRICE PER  
STUDENT  
\$30**

**DISCOVER** how technology and engineering have allowed medical scientists to venture into the human body.

Students are immersed into the world of inner space using the tools of a medical research scientist. This hands-on experience explores how to use one of the most important scientific tools in life sciences today - the micropipette.

This tool measures the tiny volumes that are required to work inside cells. Students then enjoy a fun exploration of the Lotterywest BioDiscovery Centre's interactive displays in an 'amazing race' activity.
