

# Out of Field Teachers

## Support Workshop 2: The teaching of mathematics to Year 7 - 10 students

This is the second series of workshops in the Out of Field Teachers Pilot that began in late 2017.

Interested participants **do not need to have attended the first workshop** in order to gain useful knowledge, understanding, skills and strategies from this series.

The workshop will address assessment and moderation, distinguishing between assessment of learning (summative) and assessment for learning (formative) as well as investigating the SCSA moderation process. Diagnostic testing, when to do it, why and how, will also be addressed. The afternoon session is designed to give participants the opportunity to work with each other in planning a topic for semester 2 which they can take away and use.

### Session times

Date	Thursday 12th July	Friday 13 July	Tuesday 17 July
Time	8:30am – 4:00pm	8:30am – 4:00pm	8:30am – 4:00pm
