

Emerging Engineers Competition

An OceanWorks and UWA Girls in Engineering Initiative

The UWA Girls in Engineering program and OceanWorks are excited to launch the Emerging Engineers Competition, a team-based problem-solving challenge for female students.

Students are invited to investigate and pitch their solution to a real, widespread problem in marine engineering/ science and learn from current leaders in the field. Participating students have the opportunity to visit UWA and connect with experts in STEM careers, as well as access to a collection of digital and print resources to support their work.

Finals will be held at UWA's Indian Ocean Marine Research Centre in front of world-class researchers and industry partners to claim an amazing prize worth \$1,000 and unique educational experiences from the UWA Oceans Graduate School.

All female students in Western Australia across Years 1-12 are invited to join. Registrations are now open and will close 12 April 2020.
