

Meet a

RESEARCHER

for National Science Week

Celebrate **National Science Week** by inviting a real-life Telethon Kids researcher to your class to talk about what a real career in science looks like.

Watch how our researchers bring **STEM** subjects to life through hands-on activities and games, to demonstrate the value of science in life and careers. Sessions are suitable for students in Years 3-6 and cost \$120 for 2 classes.

There are limited sessions available throughout Term 3, so book your slot today by emailing schools@telethonkids.org.au
